

## LANHAM ASSOCIATES®

Supply Chain Excellence

### Lanham Associates®

Lanham Associates® provides supply chain business value to middle market distributors and manufacturers by streamlining operations, cutting costs, and increasing overall productivity. Every day more than 120,000 users in 21 countries rely on Lanham supply chain solutions and services to do their jobs well.

Uniquely, Lanham solutions allow users to keep all of their data right at their fingertips in Microsoft Dynamics 365 Business Central/NAV. No tedious customizations or integrations with external sources are required. There is no new user interface to learn. Just best practices built to run inside your business system.

Lanham solutions are specifically designed to work together, so you can start anywhere and grow by adding feature sets according to your business needs. It's seamless simplicity at its best, and it's reflected in all of Lanham's offerings.

### Demand Planning (formerly AFP)

Demand Planning (DP) is a best-fit forecasting and replenishment system for both manufacturers and distributors. It gives companies unprecedented visibility to inventory and enables them to increase profits while also increasing customer service levels. Delivered with 18 formulas that can be modified, DP embraces customer and vendor collaborative forecasting, promotions, Distribution Requirements Planning, hub-and-spoke replenishment, and rollup options.

For manufacturers, Demand Planning Production compares the finished goods forecast to time-phased expected inventory to determine the quantity and timeframe in which products should be produced. A set of user-defined increments are then used to create simulated production orders to drive demand for component or intermediate production items.

### E-Receive

E-Receive utilizes barcoding to enable the receiving process and automate the warehouse. The user scans incoming items to record their receipt. The process also provides for assigning and printing new barcodes, as well as capturing lot and serial numbers and other important product information.

### E-Ship

E-Ship is available to plan and execute shipping from the time of sales order through shipping manifest. E-Ship has the popular package carriers such as FedEx, UPS, and USPS embedded in it for U.S.-initiated shipments and it supports both multi-point and international shipping requirements.

### Lanham EDI

Lanham EDI includes a translator and logical mapping tool to allow the seamless mapping of EDI transactions and cross-referencing to occur within the business system. Documents are automatically filed in their respective places in Dynamics 365 Business Central/NAV and can also be viewed in an EDI folder.

X12, EDIFACT, UCS, and cXML standards are all supported natively. The Lanham VAN (Value Added Network) is available to reduce the total cost of processing EDI.

Lanham EDI provides an extensive number of documents for use in Inbound or Outbound EDI. Shipping from 3PL operations is also supported.

### ACE Warehousing

ACE Warehousing extends Dynamics 365 Business Central/NAV's basic warehousing functionality. It provides a rich application to access all warehouse activity documents and transactions, using wireless handheld devices.

ACE Warehousing embraces functionality from fixed bins through more sophisticated WMS concepts, including item tracking, directed put-away, and pick-to-tote functionality.

Real-time access to inventory in ACE Warehousing dramatically increases warehouse accuracy and efficiency.

### Outbound Warehouse Request

Outbound Warehouse Request is the warehouse manager's primary workflow planning tool. It enables all of the activities required to get goods planned for shipment and moved off the dock efficiently. Whether you ship from sales orders or a WMS, shipments can be automatically prioritized based on completed orders, best customers, highest revenue, package carriers, or other key information.

## Inbound Container Tracking

Inbound Container Tracking uses an inbound ASN (Advance Ship Notice) received via EDI, or imported from Excel, to create and track containers. This type of information updates expected receipt dates and accurate quantities of the inbound items while they are on the water.

## Recognition

Lanham Associates is a Gold-Certified Dynamics ISV partner as well as a Direct CSP – Cloud Service Provider. Lanham created the first advanced distribution functionality for what is now Dynamics 365 Business Central. The original product was sold to Microsoft, and Lanham has been providing complementary, proven supply chain solutions in Dynamics 365 Business Central/NAV for over 20 years.

Lanham products have held the distinguished “Certified for Microsoft Dynamics” approval in NAV, and are offered as certified extensions for Microsoft Dynamics 365 Business Central. They also hold “Certified Partner Solution” designations from UPS, FedEx, and USPS. Lanham is a Platinum FedEx Partner Provider.

## Product Availability

Lanham products are available through key contracted Lanham partners in the Microsoft Dynamics reseller channel or via Microsoft AppSource.

Lanham’s sister company, Absolute Value, LLC offers an ERP-independent version of the Demand Planning solution directly to its customers.

We are happy to work with those interested to demonstrate and configure our products.
